

# 362 to 800 kV Circuit Breakers General Operation and Maintenance Training

## **Level 3 Field Service Engineer Training**

DTB TRAINING CENTER GREENSBURG, PA- COURSE DESCRIPTION

Hitachi Energy High Voltage Service is pleased to offer the following three (3) day training course consisting of classroom and hands-on instruction in Hitachi Energy Greensburg, PA facility. The course is aimed to provide a general understanding of operations and maintenance of 362 to 800 kV power circuit breakers. During the classroom portion, experienced instructors will share their knowledge and expertise through interactive, engaging classroom instruction. To add further understanding, each main category of instruction will be followed by hands-on activity where students can interact with the breaker first-hand.

#### Who would benefit:

- First line maintenance managers
- Direct maintenance personnel
- Substation maintenance engineers
- Engineering managers
- Substation supervisors
- Training Coordinators or Managers

#### Included:

- 362 to 800 kV circuit breaker information manuals
- 3 continental breakfasts
- 3 lunches
- 1 group dinner
- certificate of completion

#### Certification:

A confirmation will be issued after successful participation in this course, as part of the certification process.

Within a 12 months period, an on-site assessment must be carried out along with a final review to complete certification.

#### **Duration:**

3 days

#### **Enrolments:**

Send your request to

us-dtb\_training@hitachienergy.com

#### Prerequisites:

- Must have L2 training on DTB
- Ability to read and speak English and understand wiring diagrams and drawings
- On-site experience on DTB Installation and/or Commissioning
- Attended the local required Health & Safety Training
- First aid course with certificate
- Own PPE
- Computer with admin rights

#### Day Subject

### Introduction to Breaker

#### Fundamentals

- Breaker safety
- Switching
- Grounding
- Pole assembly
- Removal of bushings
- Bushing lifting points
- Through-rod connection
- Maintenance proce
  - dures /
- schedules

362 to 800 kV Interrupter

## theory and maintenance / Interrupter Removal

- Interrupter overview
- Contact inspection
- Interrupter installation
- Grading capacitors
- Closing resistor

## Operating Mechanism (AHMA-8/11 & HMB-8/11)

- Principles of operation
- Hydraulic mechanism
- Maintenance procedures / schedules
- - Trip / close coils
  - Trip / close latches
  - Auxiliary switches
  - Duty cycle
  - Troubleshooting
  - Spare parts

#### **Installation and Commissioning**

- Lifting the breaker
- Mounting to foundation
- Electrical controls & alarms /lockouts
- Breaker timing
- - Moisture analysis
  - CT ratio and polarity
  - Contact resistance

#### **SF6 Handling Procedures**

- Gas filling and vacuum procedures
- SF6 by-products
